## **Health & Safety Policy**

Thapar Institute of Engineering & Technology is committed to providing a safe and healthy environment for its employees, students, visitors, contractors, vendors, etc.

Health and Safety is a shared responsibility. The Institute expects every member to take personal responsibility and accountability for promoting the safety of themselves and those involved in, or affected by, the Institute's activities. The Institute is committed to ensuring that its health and safety practices reflect good practice, with legal compliance as the absolute minimum. The Institute is committed to actively promoting participation and engagement by all its stakeholders in developing the skills, knowledge, and resources to maintain a healthy and safe environment. Where the Institute engages another organisation to work at or for the Institute, employees responsible for the contract must consult, cooperate and coordinate with the Institute in relation to health and safety.
