

Thapar Health Centre

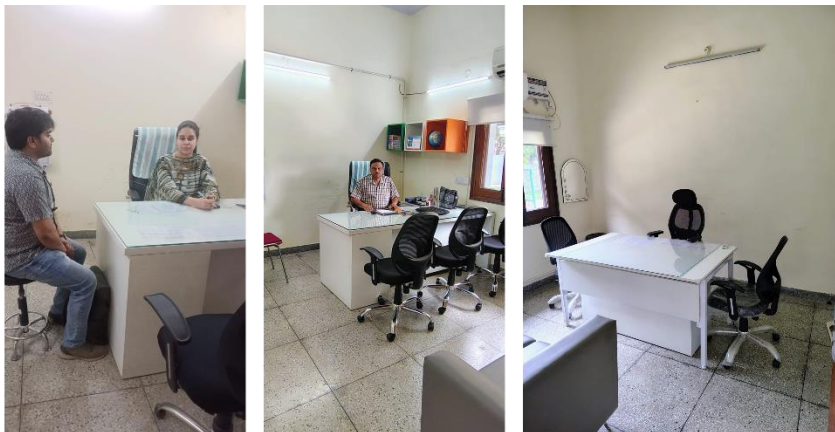

Number of wheelchairs available on campus: **06**

Access to physical healthcare services, including information and education services (Evidence required: Photographs of dispensary, doctor's rooms, and relevant TIET webpage links)

Access to physical healthcare services at Thapar Institute is ensured through the Thapar Health Centre, which provides comprehensive medical support to students, faculty, and staff. The facility includes a well-equipped dispensary, dedicated doctor consultation rooms, and in-patient care rooms with necessary medical infrastructure. Qualified medical professionals are available for regular check-ups, emergency care, and health consultations. In addition, the institute promotes health awareness through information and education services via official TIET webpages and periodic health initiatives, ensuring a holistic approach to physical well-being on campus.

Support services for persons with disabilities (Evidence required: Photographs and relevant TIET webpage links)

Thapar Institute ensures inclusive support services for persons with disabilities through accessible infrastructure and dedicated assistance mechanisms. The campus is equipped with ramps, lifts, and barrier-free pathways to facilitate easy mobility, along with specially designed restrooms and support facilities. The institute also provides academic and administrative assistance as required, ensuring equal access to educational resources and campus services. Relevant information and guidelines are made available through official TIET webpages, reflecting the institute's commitment to an inclusive and supportive environment for all.

Access to sexual and reproductive healthcare services, including information and education services (Evidence required: Photographs and relevant TIET webpage links):

Thapar Institute ensures access to sexual and reproductive healthcare services through the Thapar Health Centre, which provides confidential medical consultation, guidance, and basic treatment related to reproductive health and well-being by lady Doctors. Qualified healthcare professionals offer counselling, awareness, and preventive care services, while maintaining privacy and sensitivity. In addition, the institute conducts health awareness sessions, workshops, and educational initiatives, and disseminates relevant information through official TIET webpages to promote informed and responsible health practices among students and staff.
